

It's no secret that **proper nutrition** and **daily movement** are two key contributors for maintaining and improving both mental and physical health. This is true for everyone—including those who have cancer and are undergoing treatment. Because nutrition and exercise go hand in hand with preventing and fighting cancer as well as leading an overall healthy life, Mission Hope is pleased to offer this class for current patients and survivors alike that features interesting topics on food and fitness. Join us to enjoy free refreshments, delicious recipes, exercise tips and accessories and more!
